

IELTS Writing 2

静态图的差额排序

The chart below shows depth of snow in a particular ski resort in Canada in three individual years.

Summarize the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

动态图的OV段，动态图也讲两个：①极值以及极值超越关系；②趋势

key feature: 月份11-1,2-4; 11-1, 年1、3和年2相差大; 2-4, 年1最大, 之后被年2超越

The following line graph depicts how deep is the snow in a specific Canadian tourist attraction for skiing in year one, year two and year three.

可以改成 **how deep the snow was at a particular ski resort in Canada in three separate years**

Overall, a significant increase in average snow depth was occurred from January to February which the February one was twice larger than the January. Also, year three was recorded the biggest average snow depth among the three individual years from November to January. From February to April, the average snow depth in year two overtook the year one and had the deepest average depth of all.

被动语态错误: **“was occurred”是错误的, 因为 occur 是不及物动词, 没有被动语态** ;
定语从句错误: **“which the February one...” 结构破碎, 缺少谓语连接。第二句试图包含太多信息, 导致结构混乱。**

- It: 指代前面提到的那个特定的事物（定指）。
 - One: 指代前面提到的那类事物中的一个（不定指）。
- 简单来说就是“同名同物”用 It, “同名异物”用 One。

these指代的是情感态度和你比较近的, those是情感态度比较远的, 比如说我们说那些不好的习惯, 那就是those bad habits

among those years 可以换成这些表达:

- of all the years**
- over the period**
- across the years shown**
- compared with the other years**
- during the whole period**

有时间不一定是动态图, 因为Y1,Y2,Y3不一定是线性的

至少要线性才能用动态图的思路

静态图的思路: ①后三个月数量>前三个数量

②最特殊的最值, Apr Y2的最值最大最明显

exercise:

Overall, the average snow depth in all three years **exhibited the pattern of being relatively low from November to January**, then rising significantly from February to April. Additionally, the snow depth in the second year remained the lowest among the three years for most of the period, before becoming the highest in April.

210417 W1: The table below shows the percentage of people unemployed in the total labor workforce across 9 countries in 1994 and 2004. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Country	Unemployment rate (% in labour force)	
	In 1994	In 2004
Ireland	14.8%	4.4%
Poland	12.4%	19.0%
Italy	11.8%	8.4%
Canada	10.6%	7.7%
UK	9.5%	4.7%
Germany	7.0%	9.4%
USA	7.2%	5.4%
Australia	5.0%	5.4%
Japan	2.7%	4.7%

the following diagram depicts what proportion of unemployment individuals of all the workforce was in different countries from 1994 to 2004.

Overall, besides Poland, Germany, Australia and Japan, a decrease of unemployment rate was taken place during a decade from 1994 to 2004. Also, the unemployment rate in Poland exceeded the Ireland one and had the biggest unemployment rate in 2004.

例句：Overall, Poland replaced Ireland as the country with the highest unemployment rate. **Besides, **while a majority of these countries witnessed a decrease in unemployment over the decade, **notable exceptions** were Poland, Germany, and Japan, where rates rose.

上面两个都是非典型的图表，第一个bar图看上去是动态，但是因为在年份这个尺度上的时间是非线性的，因此不是一个动态图而是静态图

第二个table看上去是一个静态图，但是因为年份是线性的，因此这实际上是一个动态图

“what proportion of unemployment individuals” → 应为 “what proportion of unemployed individuals”; “unemployed” 作形容词，“unemployment” 是 **名词**，这里需要形容词修饰 individuals;

“a decrease of unemployment rate” 应为 “a decrease in the unemployment rate”;

“was taken place” 语法错误。“take place” 是不及物动词短语，不能用被动式。应改为 “took place”

排序思路复习：

纯排序

In 年份, C1 and C2 were the 最高级 (most popular\ biggest....) among C 总, **with** 数据 + 单位和数据+单位,respectively.

Second to them was C3, **which took up** 数据 + 单位.

Ranking below it were C4, **falling at\ accounting for\ standing at\ representing** 数据+单位.

Subsequently, C5 (数据+单位) was the 最高级 (least popular\ shortest....) one.

注意事项： *高度关注主谓一致和指代词 **

---**accounted for 只能用在 table 和 pie 中, stood at 只能用在bar 和 line 里面

//如果是百分比可以用 constituted\ comprised

模板变体 (项目数量更多的情况)

C1 accounted for \ stood at 数据+单位,occupying the largest share\ part in C 总.

Ranking below it was C2, which represented 数据+单位。

C3(A of B) was 数据+单位 (差额) fewer \ less than that\those of C2, **followed by**

that \ those of C4 (数据+单位)。

The least popular ones were C5, C6 and C7, taking up 数据+单位（求和） in total\ ranging between 数据+单位 and 数据+单位.

特殊分类思路和表达（题目的项很多，每个项的占比可能只能合并才能着重写段内的比较关系）

分类1：

看数据版本，最大值比其它值大很多的时候

最大值 C1 – 一类

其他值 C2, C3, C4,C5– 另一类

中文思路：如果分开来看， C2, C3, C4,C5 都不算大， 合在一起数据会达到多少， 再与最大值做对比。（可以侧面体现C1的dominant）

C1 48%

C2 C3 C4 C5 50% （这样就可以构造出C1和C2-C5之间的对比关系，用C2-C5之间的和从而侧面体现出C1的重要性）

C6 2%

If considered separately, C2, C3, C4 and C5 did not represent much \ many + 单位, and\but these four would amount to 数据+单位 in total, which was 数据+ 单位（差额）（much \ marginally)more \ less \ fewer than(that \ those of)C1,let alone (that \ those of)C6.

While C6 was the 最小， with only 2%.

and 如果分开不大， 合在一起也不大 but 如果分开不大， 合在一起就很大 much more 大很多

marginally more 大一丢丢

主语一致的前提下，有三种方式让句式多元化

c1 was c 总 + 后置定语

- Tokyo was the city with the most passengers. - 介词
- Tokyo was the city which had the most passengers. - 定从
- Tokyo was the city having the most passengers. - 非谓语动词

如果你想让主语不一致，那么有六种方式让句式多样化

例如：

The table below gives information about the underground railway systems in six cities. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Underground Railway Systems

City	Passengers per year (in millions)
London	775
Paris	1191
Tokyo	1927
Washington DC	144
Kyoto	45
Los Angeles	50

Tokyo是这六个城市当中载客量最大的城市，达到了1927million每年

1.小标题做主语

The number of passengers in Tokyo was the highest among the six mentioned cities ,reaching 1927 million per year./which reached/at 1927 million

...mention...

2.城市做主语 （用特殊的动词，而不能用弱动词）

弱动词：have/get/let/make

Tokyo

Tokyo boasted the greatest carrying capacity among the six mentioned cities,reaching 1927 million per year.

Tokyo topped the list at 1927 million per year.(topped只能在列表/Table里面用，如果在其他图表例如line，pie里面就不明显)

Boast: of a person\ place\ thing possesses a feature that is a source of pride

3.题目中心词做主语

Tokyo subway carries the most passengers xxx

4.比较级表最高级做主语

More passengers are transported by Tokyo subway than any other subways in the six cities,which reached 1927 million per year.

5.万能主语

The figure for Tokyo was the highest among xxx
the figure for指的是 The number of passengers in

句型复习训练：

1974年，road 是运输货物最多的一种在四种交通方式中，达到了70 million tonnes.

万能主语： The figure for road was the highest among the four transportations , which was up to 70 million tonnes/reaching 70 million tonnes/with or at 70 million tonnes.

transportation modes

人\城市做主语 People used road to deliver the most parcels among the four transportations transportation modes, reaching 70 million tonnes in 1974.

中心词： Road delivered the most packages among the four transportation modes , at 70 million tonnes in 1974.

比较级做主语： More goods were delivered by road than any other 3 transportation modes , reaching 70 million tonnes in 1974.

静态图的对比关系表达方式的多样化

对比 A 和 B

多多少，少多少，几分之几，几倍，相等，相似

多： A(要带单位，例如下面的The size of) was 数据+ 单位 more than B.

The size of room A was 数据+ 单位(例如 10%)more than that of room B.

A OF B was 数据+单位 more than that \those of C.

注意要点：

完整的句子应该是 the size of，但是语法当中省略，the size of room a 对应that of room b ；Size是单数，或者出现不可数名词用 that 前面的词是复数，那么用 those

少： A was 数据+ 单位 fewer \ less than B.

The size of room A was 数据+ 单位 fewer\ less than that of room B.
A OF B was 数据+单位 fewer \ less than that \those of C.

倍数关系: Twice \ three times\ four times

基数词+ times 可以表达几倍

A was twice larger \ more than B.

The size of room A was twice larger than that of room B.

A OF B was twice larger than that \ those of C.

The new campus is **three times as large as** the old one. = The new campus is twice larger than the old one.

它比它大两倍=它的三倍大

同级比较: A was twice as large\much\many- 原级 as B.

The size of room A was twice as large as that of room B.

A OF B was twice as large as that\those of C.

倍数的另外表达方式: double \ triple\ quadruple

A was double(adj)B.

A doubled(verb.).

Double: adj. \ adv. \ v. \ n.

His income was double(adj)mine.

He earned double(adv)what I do.

几分之几

5/7 five sevenths: 基数词 /序数词 (s)

one **out of** ten , fi ve out of seven

the ratio of xx was 5 against 7

特殊表达: half=>a half of ; quater=> a quater of

只适合于动态图的对比

A increased by 100%. – A 翻了一番

A doubles from 10 to 20. A 翻了一番

A increased three times \ threefold from 10 to 30.

相等:

A was the same as B./A was equal to B.

相似:

A was similar to B /A was close to B

根据项目特点：把项目分成两个大的类别

我们可以借助一些项目的特点，来进行分类，这样就方便写常见的分类 Sa Sb

public \ private transport

environment-friendly mode\ environment-unfriendly mode

indoor\ outdoor activities

leisurely \ educational purpose

multilingual group\ monolingual group

developing\ developed countries\ regions

European\ Asian cities

European cities \ Non- European cities A\ NON-A

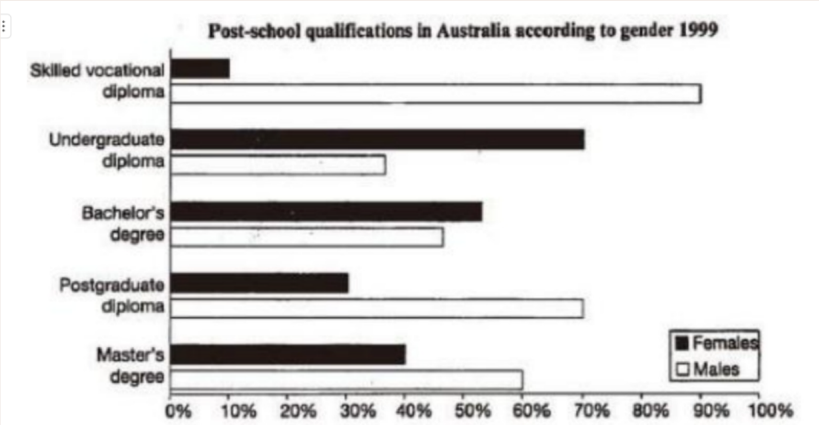

SA — C1, C2, C3 37%

SB — C4, C5, C6, C7, C8 63%

静态图的差额排序题目

The chart below shows the diff erent levels of post-school qualifi cations in Australia

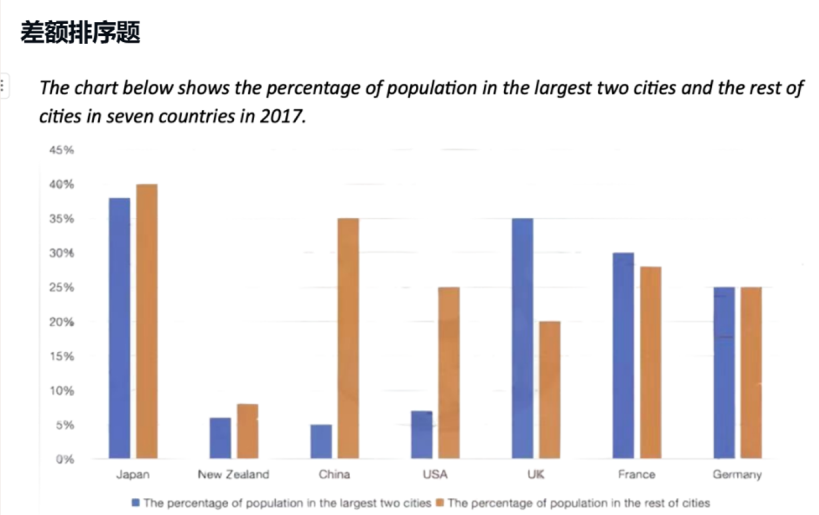

and the proportion (部分; 份额; 比例; 倍数关系) of men and women who held them in 1999.

Overall:skilled vocational diploma的男女差异最大, bachelor的男女差异最小
男生占比最大的是skilled vocational diploma, 女生占比最大的是undergraduate diploma
the following line graph depicts what stages of Australian graduated diplomas were and what percentage of qualifi ed individuals who divided by gender was in 1999 .
(或许用post-secondary diplomas会好一点)
Overall,the most signifi cant gender diff erence in qualifi ed people took place in skilled vocational diploma and the most minute gender distinction happened in bachelor's degree.Also,most of males got skilled vocational diploma and the largest proportion of females was represented by undergraduate diploma.

fall at是动态图用的, 因为是下降到的意思, 不是落在.....的意思
主体段: ①按照性别来分段
②按照gap来分段, 男性比女性多的 gap 放一段, 而女性比男性多的 gap 放第二段
the biggest diff erence lay in

The chart below shows the percentage of population in the largest two cities and the rest of cities in seven countries in 2017.

the following line graph depicts what proportion of residents was in two of the biggest cities and the other cities in Japan,New Zealand,China,the USA,the UK, France and Germany in 2017.
Overall,the biggest diff erence between the proportion in the largest two cities and the others lay in China and the smallest diff erence lay in Germany.Both the largest proportion in the two biggest cities and the largest proportion in other cities took place in Japan.
Japan,France,New Zealand and Germany had a considerable diff erence between the population in largest two cities and the rest of them, which was less than 5 percent . Specifi cally,both Japan and New Zealand had a distribution which the percentage of residents in other cities was bigger than the largest cities.By contrast,the population in the largest two cities in France was bigger than the other cities' population . Also, the population in the largest two cities was basically equal to the population in o ther cities.
A signifi cant diff erence lay in China,the USA and the UK .Distinctively,Both chinese and american population in the biggest two cities was signifi cantly less than the residents in other cities, which China had 30 percent diff erence and the US had less 20% percent diff erence.For the UK, the population in the biggest two cities

was significantly larger than the other cities population which had 15 percent difference.

动态图主体段分类思路

我要怎么说一个趋势的变化呢?

①是上升还是下降

②↑↓的程度怎么样

动词词单

剧烈地上升=经历了剧烈的上升

v+adv=v+ a + adj+n

这里放过去分词的目的是：因为数据基本上是过去的，用过去式比较好

你事情没过去，你咋收集的数据

要么就是未来的一个 predict

上升类

v. 原型	过去式	过去分词	名词	特别注意
Increase	Increased	Increased	Increase	
Rise	Rose	Risen	Rise	
Grow	Grew	Grown	Growth	
Climb	Climbed	Climbed	Climb	
Go up	Went up	Gone up	Upward trend	
Soar	Soared	Soared	Soaring	激增，不与程度adv. 连用
Rocket	Rocketed	Rocketed	Rocket	
Ascend	Ascended	Ascended	Ascent	
Surge	Surged	Surged	Surge	increase dramatically=surge surge dramatically
Escalate	Escalated	Escalated	Escalation	

Increase、Rise、Grow、Climb、Go up都是一般的上升

Go up的名词用experience an up trend

Soar、Rocket、Ascend、Surge、Escalate都是剧烈的上升

由于动词本身就表示激烈的上升，所以不需要和程度副词连用。

increase dramatically=surge=ascend=soar

下降类

v. 原型	过去式	过去分词	名词	特别注意
Decrease	Decreased	Decreased	Decrease	
Decline	Declined	Declined	Decline	
Drop	Dropt \ dropped	Dropt \dropped	Drop	
Plunge	Plunged	Plunged	Plunge	骤降，不与程度副词连用
Plummet	Plummeted	Plummeted	Plummet	暴跌
Fall	Fell	Fallen	Fall	
Go down	Went down	Gone down	Downward trend	
Dip	Dipped	Dipped	Dip	轻微下降，不与程度副词连用

表示轻微的下降是 dip

Decrease、Decline、Drop 这三个“D”都是一般的下降
激烈的下降就是 plunge 和 plummet 两个 P 开头的词

轻微和激烈的下降都不和程度副词连用

保持不变类

- Remain\ remained stable – a stable trend
- Keep \ kept steady
- kept \ remained constant
- Remained \ kept unchanged
- Level\ leveled off

波动类

v. 原型	过去式	过去分词	名词 
Fluctuate	Fluctuated	Fluctuated	Fluctuation
Wave	Waved	Waved	Wave
Vibrate	Vibrated	Vibrated	Vibration

优先用 fluctuate 再用 wave 再用 vibrate

反超类

v. 原型	过去式	过去分词	名词 
Overtake	Overtook	Overtaken	Overtaking
Overpass	Overpassed	Overpassed	Overpassing
Exceed	Exceeded	Exceeded	Exceeding

overpass 这两年，有的考官说不够正式，所以咱们就保险就不写，我们就写 overtake 或者 exceed

相交类

- Intersect with
- Intersected
- Intersected
- Intersection

最值类

- 最大值
 - Reached the highest point at \ of
 - Reached the peak at \ of + 数据
 - Peaked at
- 最小值
 - Reached the lowest point at \ of
 - Arrived the bottom of \ at

平行类

- parallel
- be parallel to

副词词单：

highlight的是成为adv时形态有特殊变化的

幅度大 – 剧烈的		幅度小 – 轻微的	
Adj.	Adv.	Adj.	Adv.
Sharp	Sharply	Slight	Slightly
Dramatic	<u>Dramatically</u>	Moderate	Moderately
Signifi cant	Signifi cantly	Gradual	Gradually
Considerable	<u>Considerably</u>	Steady	<u>Steadily</u>

Rapid	Rapidly	Slow	Slowly
Sudden	Suddenly	Gentle	Gently

注意：decline slightly =experience a slight decline = dip =experience a dip

动态图的主语多样性

1. 数据+extent+change in data

The proportion of women engineers in aerospace(主语)rose consistently from 7% in 2009 to 21% in 2020.
2. 变化+extent+change+can be seen in sub,change in data
A significant hike can be seen in the proportion of women engineers in aerospace,from 7% in 2009 to 21% in 2020.
3. 年份/其他时间 名词 + saw/witnessed a +adj/adv +change in 宾语(要描述的对象).

The years between 1999 and 2009 saw/witnessed/experienced a significant hike in China's GDP.

改写：The years between 2009 and 2020 experienced a significant hike in the proportion of women engineers in aerospace ,from 7% to 21%.
- 4 要描述的对象 + demonstrated/experienced an upward/downward trend+increasing/decreasing from...to...

The number of visitors demonstrated an apparent upward trend,increasing from 11,000 to 127,000 from 2007 to 2015.

改写：
5. There be +extent +change in sub,change in data

There was a consistent rise in the proportion of women engineers in aerospace ,from 7% in 2009 to 21% in 2020.

改写：

动态图中数据的表达方法

1. 一系列数据：
before和after
The proportion of women engineers in aerospace rose consistently from 7% in 2009 to 21% in 2020, before/after which a predicted further hiking to 29% in 2026.
OR：and then is expected to further hike to 29% in 2026. (注意这是顺承关系)
OR：followed by a predicted jump to 29% in 2026. (注意这是顺承关系)
and then+完整句子； followed by + 名词词组
before=after which, 句子顺序不变
在翻译的时候，先翻译before/after which从句里面的内容，再翻译主句
before换成after的时候，句子顺序颠倒
- Once (once领导的从句需用完成时) 和until

Once the proportion of women engineers in aerospace has risen rapidly from 7% in 2009 to 21% in 2020, that figure is predicted to be higher at 29% in 2026.

Until 2020, the proportion of women engineers in aerospace has surged from 7% in 2009 to 21%, and the figure is expected to further reach 29% in 2026.

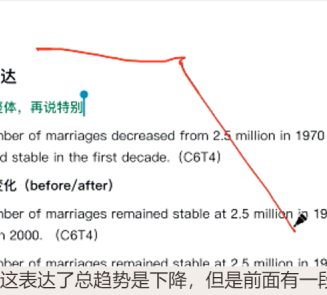

When it comes to 2026, the ratio of women engineers in aerospace is expected to be higher at 29%,which is predicted from the fact that/as the proportion has risen consistently from 7% in 2009 to 21% in 2020.

By the time of 2026 ,the ratio of women engineers in aerospace would surge to 29%, following the rising trend from 7% in 2009 to 21% in 2020.

特殊表达

- 1.先说整体，再说特别

The number of marriages decreased from 2.5 million in 1970 to 2 million in 2000, although it remained stable in the first decade. (C6T4)

要点

输入正文或"/"插入内容, 双击 唤 唤起 AI

分类思路

静态图和动态图主体段落展开

1. 先说整体, 再说特别

The number of marriages decreased from 2.5 million in 1970 to 2 million in 2000, although it remained stable in the first decade. (C6T4)

2. 数据变化 (before/after)

The number of marriages remained stable at 2.5 million in 1970 and 1980, before declining to 2 million in 2000. (C6T4)

The number of marriages remained stable at 2.5 million in 1970 and 1980, after which it declined to 2 million in 2000. (C6T4)

3. 虽然升了仍然最低, 虽然降了仍然最高:

(although 常搭配倍数 -fold)

Although the figure for insurance rose fourfold to 8%, it remained the lowest. (C8T2)

4. 趋势相反或相似: (there was an opposite trend in ..., rising from ...)

There was an opposite trend in the figure for resources, rising steadily to 20% in 1991 and then declining rapidly to 9% in 2001. (C8T2)

然后我说它中间有一段是平的不就好了吗

这种线段也可以这样说

2.数据变化 (before/after)

The number of marriages remained stable at 2.5 million in 1970 and 1980, before declining to 2 million in 2000. (C6T4)

The number of marriages remained stable at 2.5 million in 1970 and 1980, after which it declined to 2 million. (C6T4)

3.虽然升了仍然最低, 虽然降了仍然最高:

(although 常搭配倍数 -fold)

Although the figure for insurance rose fourfold to 8%, it remained the lowest. (C8T2)

4.趋势相反或相似: (there was an opposite trend in ..., rising from ...)

There was an opposite trend in the figure for resources, rising steadily to 20% in 1991 and then declining rapidly to 9% in 2001.(C8T2)

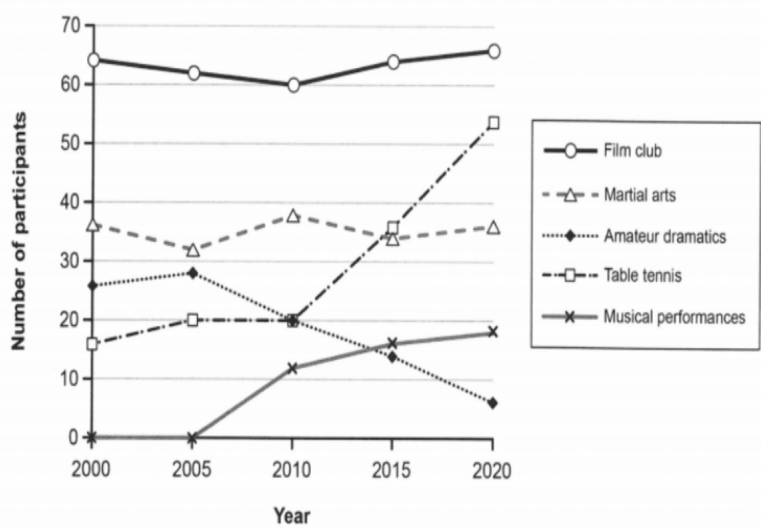

The two pie charts show how different industries used electricity in 1995 and 2005. Summarize the information by selecting and reporting the main features, and make comparisons where relevant.

Exercise:

The graph below gives information on the numbers of participants for different activities at one social centre in Melbourne, Australia for the period 2000 to 2020.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Number of participants, by activity 2000–2020

这一张动态图我们应当怎么分主体段？

可以用：Film Club、martial art、Amateur dramatics分一段
剩下的分另外一段

也可以：分三段，从大到小，FC、MA分一段；Ad和Tt分一段；Mp单独一段；那么段间对比就完成

接下来看段内对比：

第一段：film club 在2010年它是最低的是，虽然它整体是最高，但是它在2011年有最低点。然而，这个 martial arts。在20年相反是最高的，它出现了高点，然后再描述这个线的一个变化趋势，它在30.40之间波动搞定？

第二段：

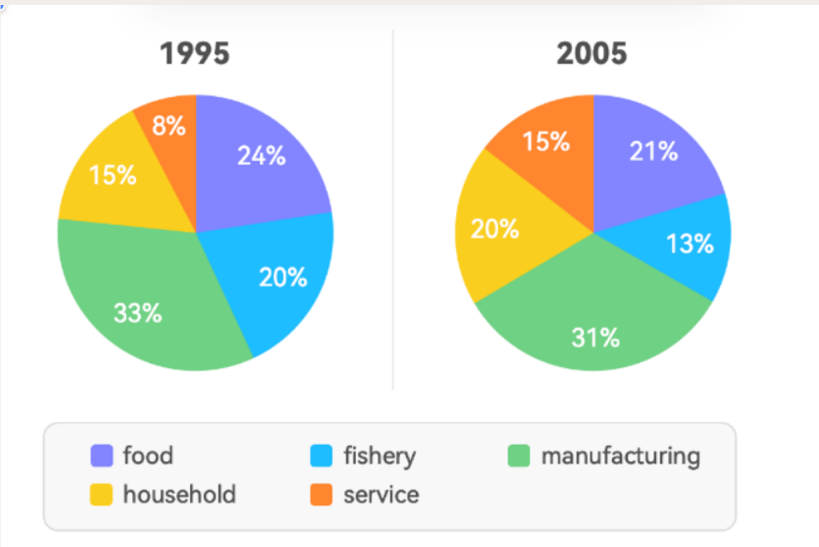

第一种就是我按时间段去分。比如说我们来看，2001年到2005年它俩都是上升的，然后2005年到2010年，它俩的趋势开始走向不同，并且有一个交点，所以第二阶段的写作，我要把这个焦点写出来。第三阶段我写它们俩完全是相反的趋势，然后我们就写一个终点就可以了。这是按段来分，我是分成三段时间的来描述这两条线，这是第一种写法。

第二种我照样可以写出它的一个段间逻辑。我说这个一条线这条线。我可不可以用，我先整体再特殊来写？整体是下降。然而在2000.2005之间是上升的。第二个是这个也更好用，先整体后特殊整体是上升的，而在2015.2010年之间是保持不变的。是不是这样？

完了，我还可以强调一下焦点，他俩在2010年有一个交点

第三段

最后就是 what should be mentioned？还需要提到的一点是什么？musical performance 这条线 它在这20年间它一直是上升的。在前5年是保持是0。

the diagrams depicts the proportion of five various businesses which consumed electricity during the period from 1995 to 2005.

Overall, manufacturing remained the largest proportion of using electricity in this period. Also, the share of household overtook on the food and became the second place in the industries powered by electricity. Additionally, the proportion of fishery was exceeded by the proportion of service.

For the food, manufacturing and fishery industry, the proportion of using electricity decreased. Specifically, a three percent dip took place in the figure for the food and a seven percent decline happened in the share of fishery. Although the figure for manufacturing experienced a dip which was two percent, it remained the biggest.

For the household and service, there was an opposite trend to the rest of the industries which was an upward trend. A five percent growth happened in the proportion of household and the proportion of service had a seven percent soaring.

depict/illustrate + 抽象概念

compare + 具体概念

show/demonstrate/present information about

give info on

The graph demonstrates a clear upward trend.

可以等同于show

The two maps demonstrate the changes that have taken place in the village from 2000 to the present.

这两个句子的用法都可

但是在作文中，demonstrate 常用于论证观点，后面跟抽象名词或 that 从句。

比如The findings demonstrate that students perform better in smaller classes.
