

IELTS Writing 3

动态图和静态图最大的区别在于

这个数据和相较于前面的这个数据，我的上升还是下降还是波动还是不变
对于波动来说，不同时间点的数据出现的时候，我们才有资格谈波动，否则你就只是两个点之间的一条线线段，那它只有趋势，要么上升，要么下降，要么是不变。

首先overall段有区别

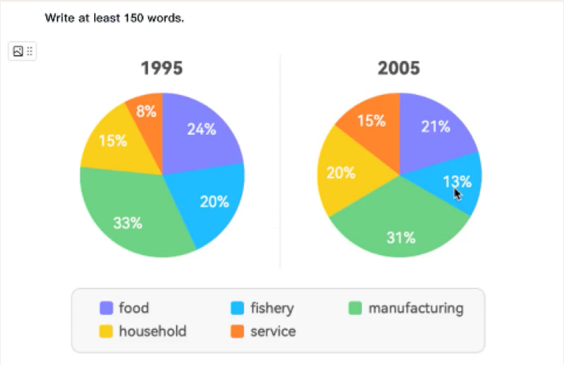

其次是主体段：**动态图主要写趋势和趋势之间的比较**

这里的趋势不仅包含趋势的幅度，还有趋势的比较、趋势的端点（起点和终点）、峰值和谷值
但是这些要点是放在一起写的而不是要单独表述

对于所有图标而言，绝对值≥10个的需要合并来写，<10个的就是每个数据都要单独写

总的来说，要写的信息点包括：

- 1.绝对的数值
- 2.该项目的地位
- 3.对比（包含数据绝对值的对比和趋势的对比）
例如the share of household overtook on the food and became the second place in the industry powered by electricity 这说的是取代关系，所以这并不是对比，也不是趋势的比较
真正要说趋势比较这句话应该长什么样子：谁上升而谁下降

同理也不是所有的项目的地位都得说，就是说这个项目比较特殊的地位变化很大的，OR说地位就是一直是最大值，然后也没变，也要讲

在这个图里面，我们可以挑少的讲，household和service地位上升的写下来，然后写其他都下降
然后当然也可以概括着来写，例如第一产业，第二产业，第三产业（但是这样写有风险，万一概括错了，很容易低分）
而且不仅是概括问题，还需要表达谨慎而不绝对

The **diagrams** depicts what the **proportions**
(注意这里不要写回去了，开头段要么改句型要么改单词)
其实开头段的基础要求只有一个：语法不出错，在这个基础上进行换词。
换词/换形式的目的是为了和给出的句子不一样
of fi ve various businesses consumed electricity **during the period from 1995 to 2005.**

the percentage of electricity consumed by five different industries in 1995 and 2005.
如果你想强调两个单独年份，你可以用in xxx and xxx; 或者用respectively
depict/illustate+抽象概念

compare +具体概念

show/demonstrate/present information about

give info on

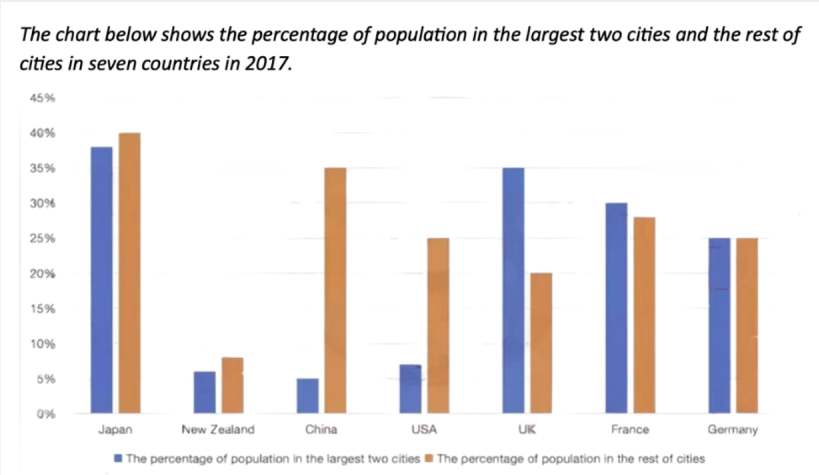

Overall, manufacturing remained the largest proportion of using electricity in this period**.A*** Iso, the share of household overtook on the food and became the

second place in the industries powered by electricity. *Additionally, the proportion of fishy was exceeded by the proportion of service.*

Overall, manufacturing remained the largest consumer of electricity throughout the period.第二句话说谁上升而谁下降；

For the food,manufacturing and fi shery indust ry, the proportion of using electricity decreased after 1995. Specifi cally, a three percent dip took place in the fi gure for the food and a seven percent decline happened in the share of fishery. (下降的幅度) 从多少到多少呢? Although the figure for manufacturing experienced a dip which was two percent, it remained the biggest. (顺序调整)

For the household and service , there was an ~~opposite trend~~ to the rest of the industries which was an upward trend. 直接说By contrast, the household and service sectors showed upward trends.**A five percent growth happened in the proportion of household and the proportion of service had a seven percent soaring.

还有这篇作文

the following line graph depicts what proportion of residents **was** in two of the biggest cities and the other cities in Japan,New Zealand,China,the USA,the UK, France and Germany in 2017.

what proportion ... was 引导名词性从句但结构别扭；residents was 主谓不一致（residents 复数，应该用 were）。

这里面应当用how much

如果你担心将短语变从句会把意思给变了的话就换词

210417 W1: The table below shows the percentage of people unemployed in the total labor workforce across 9 countries in 1994 and 2004.Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Country	Unemployment rate (% in labour force)	
	In 1994	In 2004
Ireland	14.8%	4.4%
Poland	12.4%	19.0%
Italy	11.8%	8.4%
Canada	10.6%	7.7%
UK	9.5%	4.7%
Germany	7.0%	9.4%
USA	7.2%	5.4%
Australia	5.0%	5.4%
Japan	2.7%	4.7%

the following diagram depicts what proportion of unemployment individuals of all the workforces was in different countries from 1994 to 2004.

Overall,besides Poland,Germany,Australia and Japan ,a decrease of unemployment rate was taken place during a decade from 1994 to 2004 Also the unemployment

在这里顺便讲一下这里应该是what are the tendency of来引导

Overall,the biggest difference between the proportion in the largest two cities and the others lay in China **and ,while** （这里要保证逻辑词对） the smallest difference lay in Germany.Both the largest proportion in the two biggest cities and the largest proportion in other cities took place in Japan.

句子头重脚轻

(开头两段的时态不要是过去时)

谓语动词尽可能放前面

描述性的内容放前面，细节放后面

还有一个就是，宁可重复，多写也不能漏写；不行就用 **代词**、用others，或者换词/其他的换形式的方法来解决
实在是头重脚轻了，就把多的信息放后面

例如最大值放前面，具体有多大放后

差额排序题绝对值和差值优先考虑去写

Japan,France,New Zealand and Germany had a **inconsiderable** difference between the population in largest two cities and the rest of them, which was **less than** 5 percent . 第一句话过长；冠词缺失应为 in the largest two **Specifically,**both Japan and New Zealand had a distribution which the percentage of residents in other cities was bigger than the largest cities.was bigger than the largest cities**比较对象不对等percentage 与 cities 比较；应为 **than that in the largest cities**

By contrast,the population in the largest two cities in France was bigger than the other cities' population . **that in other cities** *Also, =Similarly* , **the population in the largest two cities was basically equal to the population in other cities in Germany.**

然后尽量不要用Also而用Similarly

A significant difference lay in China,the USA and the UK .Distinctively,Both chinese and american population in the biggest two cities was significantly less than the residents in other cities, which China had 30 percent difference and the US had less 20% percent difference.the populations of China and the USA 或 the proportion in China and the USAFor the UK, the population in the biggest two cities was significantly larger than the other cities population which had 15 percent difference.所有格错误应为 other cities' population 或 that in other cities

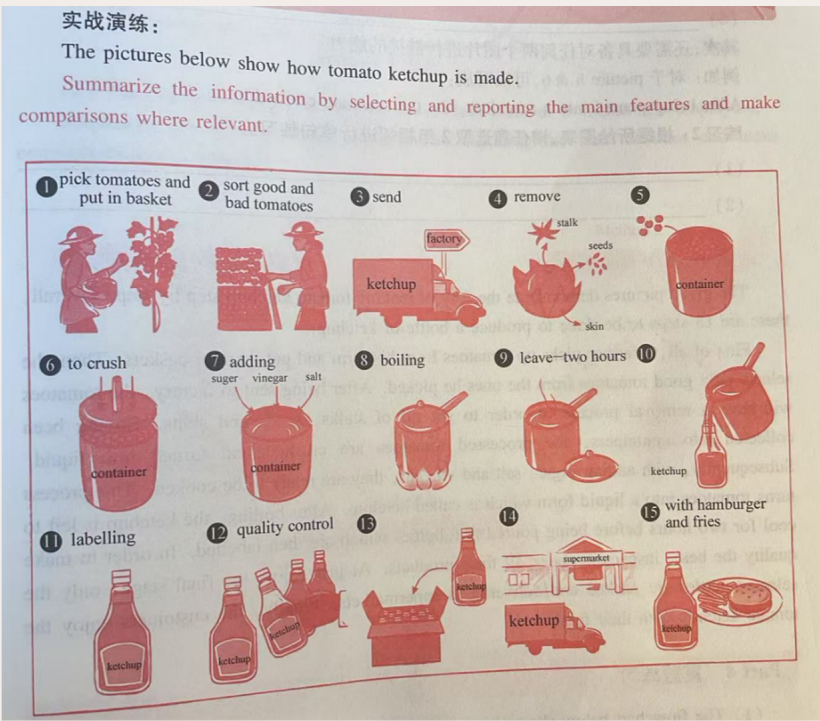

还有一个需要注意的就是每一段第一句，还有开头段和ov段不能有语法错误，而且词要精确

这两篇文章主要是从TR和CC方面去说的

TR 决定了你的定档，例如关键部位不能出错还要写得精确，例如每一段第一句，还有开头段和ov段

注意是精确，即便是简单句

然后必须要写全，而且要有对比

流程图题就是写第一步做什么，第二步做什么.....
技巧是步骤可以合并一起来写，可以通过从句让这些步骤衔接更紧密
ov段：可以写——总之整个番茄酱的制作过程总共有15个小步骤，从第一步的比如说采摘到最后一步的消化，
也可以写成总共有三个大步骤，包含第一步的粗加工、精细加工以及包装和销售

主体结构:

Introduction:
The flow chart/diagram describes/illustrates how to produce xx
Overall, the process of producing/making sth.involves(number)main steps/stages,starting/beginning with(fi rst step)and ending with(last step).
Body:(simple present tense+passive voice)
At the beginning of xxx.The next step is xxx.Following this,xxx.The last stage involves+n./doing.move on.....
Then
流程图题的主体段，一方面动词要多样，而且有时候不一定会好心给你这个动词
另一方面是时态语态要正确：例如这个番茄酱这道题，就是被动语态，主体是tomato
除此之外还有自然流程图
例如水循环，但是水是主动蒸发而不是被动的
第三是了解一堆“下一步”有关意思的连词，而且要用从句将两个句子连接起来

工业流程图常用动词:

- (1) 生产
Extract (提取) /Process (加工) /Manufacture (制造) /Assemble (组装) /Produce (生产)
从你的观点中提炼素材
extract≠refine; extract+得到了什么(素材); refine+从哪里提炼(观点)
- (2) 运输
Transport (运输) /Deliver (交付) /Transfer (转移)
- (3) 变化
Convert (转化/不变态) //Transform (转变) into
毛毛虫=》蝴蝶 transform =》不可逆的、根本的改变
水凝结冰=》convert
信仰改变=》convert
有些情况取决于强调的重点:convert忠于原著的改编; transform是魔改
Refine (提炼) /Package (包装) /Distribute (分发) **
过滤: filter /过筛: sieve
- (4) 放置
place, put (不会动词时描述出来) Position arrange
- (5) 安装
Install(用于固定安装设备或零件)
Mount(指安装到基座/支架上)
Insert(放入孔、槽等内部空间)

Load装入机器或容器（如原料、数据）

(6) 使用

Utilize, employ, use

混合combine/mix

加热: heat 冷却: cool

2. 自然流程图常用动词

(描述生物、生态、自然现象的循环)

(1) 生命循环类

Reproduce/lay（繁殖）/emerge出现

Hatch（孵化）

Grow（生长）/develop

Transform（变形）

Bloom（开花）bear fruits（结果）

Decay（腐烂）

(2) 自然现象类

Evaporate（蒸发）

Condense（凝结）

Erupt（喷发）

Absorb（吸收）

(3) 循环与流动类

Circulate（循环）

Flow（流动）

地表径流-- surface runoff

Filter（下渗）

3. 通用动词（适用于两种流程图）

Move（移动）

Collect（收集）

Store（储存）

Release（释放）

Fermentation（发酵）（做需要发酵的食品）

需要添加微生物/酵母的

沼气发电、花园堆肥

需要出现的时候，例如有提示你要写（例如有微生物参与的）你就要写

时间: It takes ... for ... to ...; This stage lasts for ..

补充:

produce生产, lay放置, accumulate积累, gather/collect收集, obtain获得, heat up加热, expand膨胀, bend弯曲, turn off关闭, cool down冷却,

disconnect断开连接, spin旋转/纺, strike打击, compress压缩, release释放, expand膨胀, move/flow流动, accelerate加速, form形成,

press按压, adjust调整, absorb吸收, form形成, process加工, rotate旋转, chop砍, grind磨(碎)/碾(碎), light点燃, burn燃烧,

ignite点燃, reflect反光, turn转, starts开始, stops结束, records录音, turns up调高, turns down调低, winds缠绕, unwinds解开, revolves旋转,

fold折叠, unfold打开, reverse颠倒/倒转, adapt适应, adjust调整, alter改变, cure治愈, disappear消失, dissolve溶化/解散, exchange交换,

expand扩张/膨胀, fade退色, increase增长, promote促进/升职, reduce减少, renew使更新/使恢复, renovate革新/更新/修复, replace取代,

swell肿胀, switch改变, transform完全改变, vary改变, swap交换, shrink收缩, melt溶解, heal/cure治愈, form/come into being/take shape形成,

produce生产, gain/get/acquire获取, evaporate蒸发, volatilize挥发, draw提取, recycle回收, extract拔, absorb吸收, collect收集,

meet相遇, be made up of由...组成, be made of由...制成, be made from由...制成, feed on以...为食, depend on/rely on依赖,

release/send out释放, sort分类, separate分开, conveyed运送, cut into切成, poured

into倒入, heated加热, melted into融化成, flows into流入

连接词

Next: then, subsequently, after that, at this point, the next step is that, following this,the following step is that,and then,after which
不用序数词因为考官想你这个“连接词汇的diversity”
The first stage is: first of all, the first step is that, to begin with, initially,
The last stage is: finally, the last step is that, **consequently.**

句子改写

The tea leaves are picked and then they are put in the sun to dry.(once)
Once the tea leaves have been picked, they are out in the sun to dry.

注意Once后面引导的句子要用完成时

The tea leaves are picked from the tea plants and packed into boxes.(after)
After the tea leaves are picked from the tea plants,they are packed into boxes.
《=》 The tea leaves are packed into boxes **after** they are picked from the tea plants.
OR 《=》 **After** being picked from the tea plants,the tea leaves are packed into boxes.
The boxes are loaded onto a lorry **and then** they are taken to supermarkets.(when)

不要用conj+独立结构（非谓语）, prep+独立结构
You put the tea bag in the cup **and then** you can pour hot water onto it.(once)

Once引导的从句 一定要完成时态
定语从句和目的状语从句
The fruit is sent to a factory.It is put into cans here.(where)
where it is put into cans
The biscuits are put in the oven. They are cooked.(in order to be)
the biscuits are put in the oven, **In Order to be** cooked,
The farmer waters the plants. This makes them grow more quickly.(which)
The mushrooms are stored in a dark room.This helps them to stay fresh.(so that)
The mushrooms are stored in a dark room **so that** they can stay fresh.

总结:

Once then, After then, 定语从句, 目的状从, Before
在写流程图的时候一定要先用以上5 个句型 – 动作

保证用了这14 个之后再使用其他的 : next, then, subsequently, after that, at this point, the next step is that, following this, the following step is that, and then, after which

原则是不重复

活动步骤（主动+被动、一般现在时、情态动词）

- 1、 and then
- 2、 ..., after which
- 3、 before (before being done)/after
- 4、 which/whose/in which case 等定从
- 5、 Until
- 6、 once
- 7、 if
- 8、 in terms of/as for/when it comes to

- 9、either ... or ...
- 10、otherwise （注意，这里的Otherwise是为了表述分叉结构，如图

停段展开

原则：不重复

活动步骤（主动+被动，一般现在时、情态动词）

1、and then

2、..., after which

3、before (before being done)/after

4、which/whose/in which case 等定从

5、Until

6、once

7、if

8、in terms of/as for/when it comes to

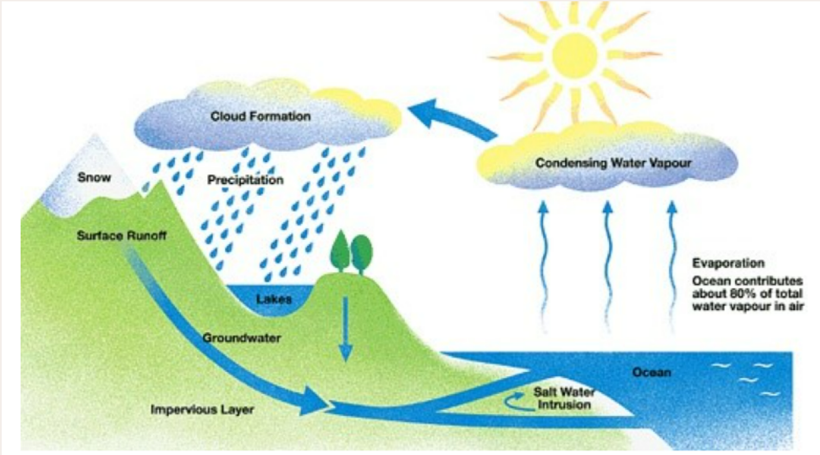

9、either ... or ...

10、otherwise

If a rejection is received, the students can complete application for alternative courses, and resubmit the application. Otherwise, the application is canceled.

If a rejection is received, the students can complete application for alternative courses, and resubmit the application. Otherwise, the application is canceled.(分支结构)

就例如这一道题

The picture illustrates the way in which water passes from ocean to air to land during the natural process known as the water cycle.

Three main stages are shown on the diagram. Ocean water evaporates, falls as rain, and eventually runs back into the oceans again.

Beginning at the evaporation stage, we can see that 80% of water vapour in the air comes from the oceans. Heat from the sun causes water to evaporate, and water vapour condenses to form clouds. At the second stage, labelled 'precipitation' on the diagram, water falls as rain or snow.

At the third stage in the cycle, rainwater may take various paths. Some of it may fall into lakes or return to the oceans via ' surface runoff '. Otherwise, rainwater may filter through the ground, reaching the impervious layer of the earth. Salt water intrusion is shown to take place just before groundwater passes into the oceans to complete the cycle.

地图题

选址类地图题

要假设读者看不到这个图

描述方位，整个图有啥，例如这张图的道路、分区

S1在哪，S2在哪

为啥选+理由

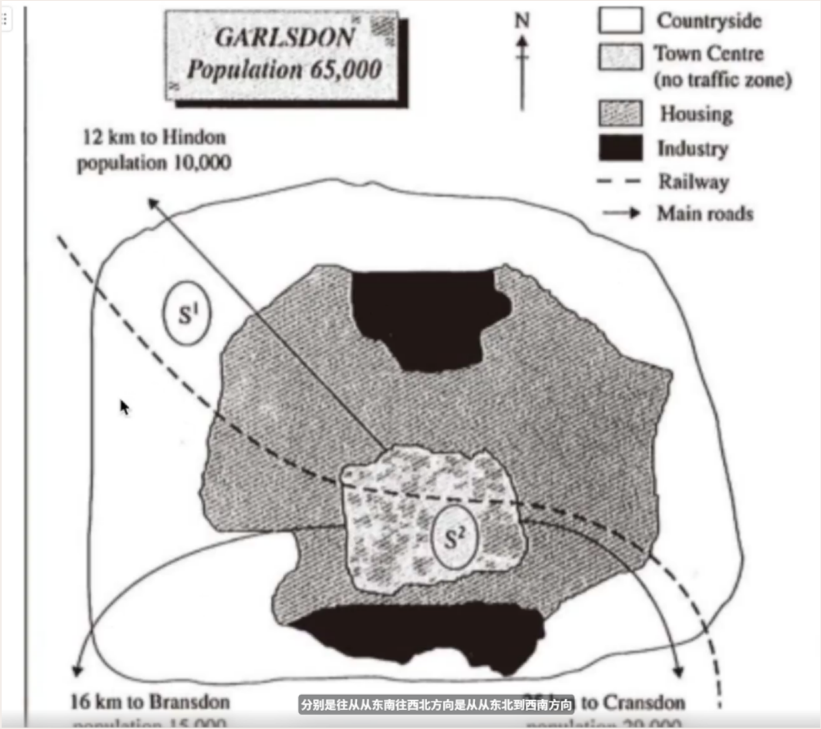

它大概就是讲这是一个小镇的平面图。然后他现在想在 s1 和 s2 这两个地方作为候选地址，他想在这两个地方，选一个地方来修一个超市，现在问你选哪个地址比较好，所以它就称之为选址类的题目好，那要注意我要默认我的读者是看不到这张图的。

但通过我的描述，他可以画出这张图，所以这就代表什么，不管地图题的第一步，首先是描述方位。

那么描述方位的句式是需要学会的

这个小镇是这样子的，最外围是 countryside，那里一圈是 housing 区
housing 的南北两端是 industry zone 在整个 housing 区域的中心是。
这个 town center 好 town center 内部是 no traffic zone with no traffic zone ok，然后
现在，然后接下来再描述几条交通线有几条这个 main roads 是通向 town center 的
分别是东南往西北方向是，从西北到东南方向的几条 main roads

从town center伸出来，延伸向小镇外部，然后接下来还有一条 main roads 贯穿了整个小镇，是西北东南方向的，这条路也横穿了 town center

这是第一段主题段，接下来第二段主题句我就要描述我到底选址选在 s1 还是 s2 好，所以我还是得讲一下 S1 位于哪里 s2 位于哪里，然后带着去说它的选址，比如说我假设我就想选 s2。

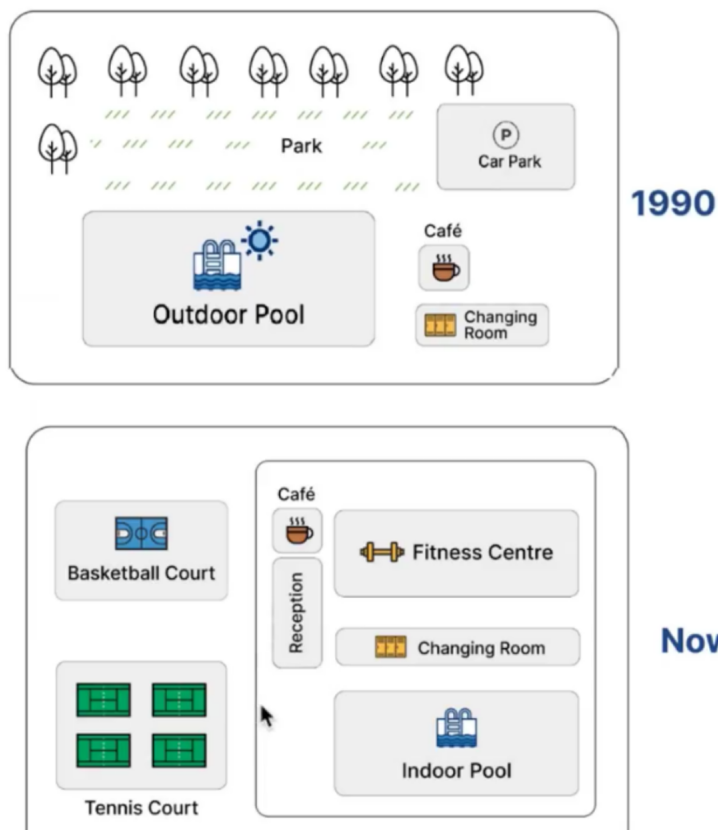

I prefer s2 作为我超市的选址，为什么？因为 s2 它位于整个市中心 town center 的中心。

人流量很大。生意就会很好，与此同时，它离 main railway 很近，因此运货应该会很方便。

那我也可以说我选 s1，因为它位于整个 countryside 的西北角地区。人口并不密集，说明这个超市可以建的很大，就是我的房租不会很贵。与此同时，它可以既服务于这个 galston 这个小镇的人口

变迁类地图题

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

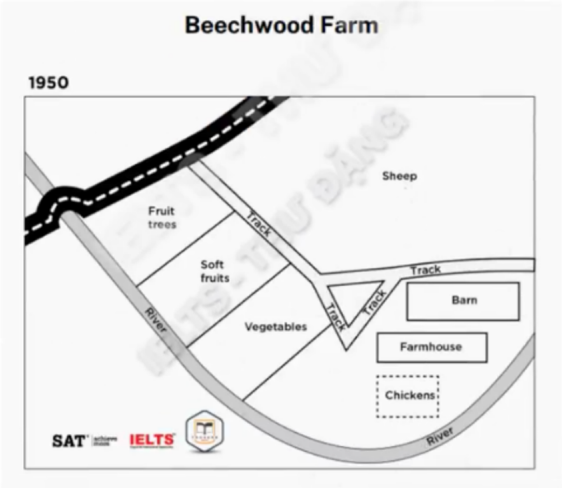

这种变迁类地图题，最关键的在于从一个休闲公园变得更加商业化、集约化

这就是ov段要写的，也就是你感觉变了什么

那么主体段就要写这个ov段的支撑证据

依旧要写方位，但是谓语动词是关于变迁的

The plans below show the site of a farm in 1950 and the same site today. Summarise the information by selecting and reporting the main features, and make comparisons where relevant

我们来乍一看

又例如这个农场的变化

从一个单纯的农场变成了更商业化，更现代化，更多样化的基地

同时从发展农业变成了发展旅游业

然后主体段写支撑的时候，可以写新增了很多设施，建了发电站，修了路

overall the beechwood farm experienced the transformation from a purely agricultural farm into a. Into a dynamic, comprehensive tourism. SITE

This can be exemplified by the introduction of new facilities and the upgrade of the infrastructures.

主体段分类思路：A可以写多了什么/少了什么；

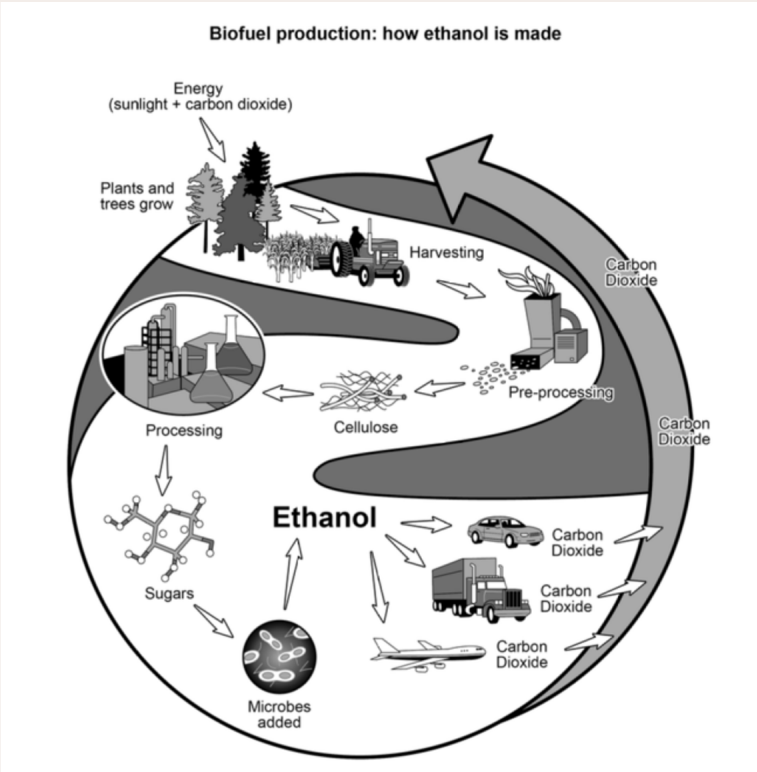

B可以两段都写变化，也就是原本是xxx的变成了xxx

如果你有大变化的话，你还是得把这整张图写出来，因为就是你要遵循读者思维，就是他看不到，毕竟是看不到图。

B 是不是字写的少一点？肯定的字写的少，那如果遇到一个很复杂的图，我是不是就优先选 B

或者说：当整体布局没有改变的时候，我们优先还是选择 a。

当整体布局有改变，我们选择 B

The diagram below shows how a biofuel called ethanol is produced.

The following circle graph presents information about making a biological fuel named ethanol.

The process of producing ethanol involves nine major steps ,from gathering sunlight and carbon dioxide as energy, to adding microbes for fermentation.Then,the ethanol is transformed into carbon dioxide by consuming them. Eventually , carbon dioxide is gathered by the plants again.

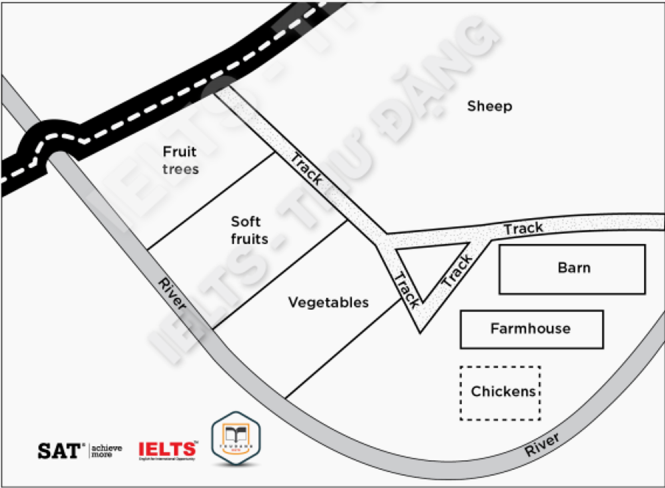

At fi rst,both sunlight and carbon dioxide are contributed to the growth of the plants and trees.Once plants and trees have harvested ,then they are preprocessed mechanically . After preprocessing,then they become cellulose.Next,the cellulose is processed into suger in factories.At last , microbes are added into the suger for fermentation .

After the fermentation,ethanol is produced,which is a biofuel for vehicles,trucks and planes to consume.After the consumption , ethanol turns into carbon dioxide .The carbon dioxide in the air is gathered by plants and trees for the second time . The whole process forms an ethanol cycle.

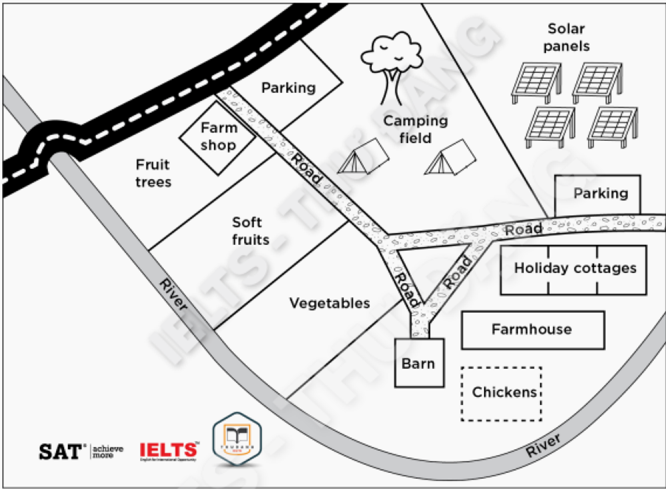

The plans below show the site of a farm in 1950 and the same site today.

Beechwood Farm

1950

Today

the following two graphs demonstrate information about the spot of Beechword Farm in 1950 and the current farm in same location.

Overall, the Beechwood Farm experienced the transformation from a purely agricultural farm into a dynamic, comprehensive tourism site. This can be exemplified by the introduction of new facilities and the upgrade of the infrastructures.

In Beechwood Farm, there is a road, which was originally a track, linked with a highway and goes towards the southeast. Then it forms a triangle junction before continuing towards the holiday cottages and another parking area. Besides, another parking lot is located in the east of the intersection with a highway and the road. Initially, on the north of the road, there was a grazing land for sheep. Now, a camping field and solar panels replace it. Additionally, solar panels are on the north of the parking lot, which is close to the cottages and a camping field is on the west of the solar panels.

On the south side of the road, the area of the fruit trees is newly possessed a farm shop that tourists can buy some agricultural goods here. In the southern end of the triangle junction, a barn is erected in here. A farmhouse is on the south of the cottages and the northeast of the barn. There is some chicken on the south of the farmhouse.
